SUMMARY

Results-driven Backend Java Developer with 3+ years of experience in the IT industry, specializing in enterprise application development for the insurance domain. Proficient in Java, Spring Boot, Data Structures and Algorithms, SQL, and AWS. Experienced in designing and developing RESTful APIs, backend services, database management, and application performance optimization. Proven ability to troubleshoot complex technical issues and collaborate with cross-functional teams to deliver robust, scalable, and high-quality software solutions.

SKILLS

Programming Languages: Java, SQL

Frameworks & Technologies: Spring Boot, Hibernate, EJB, Struts, RESTful APIs

Databases: MySQL, Microsoft SQL Server

Testing & API Tools: Postman, Swagger, JUnit

Version Control: GitHub, SVN

Cloud & DevOps: AWS (Basic), CI/CD Pipelines

Development Tools: IntelliJ IDEA, Eclipse IDE, Visual Studio Code

Methodologies & Concepts: Agile/Scrum, Database Optimization, Root Cause Analysis (RCA), Performance Tuning.

EXPERIENCE

Associate Developer | December 2022 – Present | Bangalore, India

Sapiens Technologies | RACI Insurance Project

- Developed and enhanced RESTful APIs within a monolithic Spring Boot application to support policy creation, policy updates, and claims processing, improving API performance and maintaining high application availability across multiple core modules.
- Optimized SQL queries and implemented indexing strategies in high-volume modules, significantly improving database performance and reducing data retrieval latency.
- Implemented critical insurance workflows, including premium recalculation, endorsements, and business validation logic, improving process accuracy and reducing manual intervention.
- Resolved critical production issues through detailed Root Cause Analysis (RCA), reducing recurring defects and enhancing overall application stability.
- Streamlined CI/CD pipelines by integrating automated testing and deployment workflows, accelerating release cycles and minimizing post-deployment incidents.
- Collaborated closely with QA, Business Analysts, and DevOps teams in Agile sprint environments to ensure timely delivery of backend enhancements and production deployments.

PROJECT

RAC Insurance (Sapiens IDIT Framework)

RACI Insurance is an enterprise insurance platform developed on the Sapiens IDIT Framework for international insurance clients. It is responsible for managing end-to-end insurance operations, including policy administration, premium calculation, endorsements, billing, and claims processing. The application is built using Java, Spring Boot, Struts, EJB, and RESTful APIs, with SQL for database operations and AWS for cloud-based deployment and infrastructure support. The system processes high volumes of policy and claims transactions and implements complex business rules to ensure accurate underwriting, pricing, and claims validation.

EDUCATION

Master of Computer Applications (MCA)

Sree Vaidyanathan Institute of Management | Tirupati, Andhra Pradesh
2022 | CGPA: 8.0/10

Bachelor of Science (B.Sc.) in Computer Science

Mother Teresa Degree College | Tirupati, Andhra Pradesh
2019 | CGPA: 7.5/10

Intermediate (MPC)

Mother Teresa Junior College | Palamaner, Andhra Pradesh
2016

Secondary School Certificate (SSC)

ZPHS High School | Somala, Andhra Pradesh
2014 | GPA: 5.5/10

CERTIFICATIONS

Java Programming

AWS Cloud Fundamentals
